DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1, 14-18, 52 and 54 drawn to a method in a controlling dispensing access control, classified in class 700, subclass 237.
 - II. Claims 2-6 drawn to a memory storage organizer, classified in class 369 subclass 1.
 - III. Claims 7-13, 41-51, 53, and 56-60 drawn to a reservation system, classified in class 705 subclass 6
 - IV. Claims 19-20, 29-40, drawn to a point of sale terminal, classified in class 235 subclass 381.
 - V. Claims 21-28, drawn to event tracking integrated circuits, classified in class 716.
2. Inventions I, II, IV, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as retaining data. See MPEP § 806.05(d). In the instant case, invention II has separate utility such as restocking of inventory. MPEP § 806.05(d). Invention III has separate utility such as scheduling travel plans. In the instant case, Invention IV has separate utility such as making calculator memories.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
